

Lubrication and Maintenance

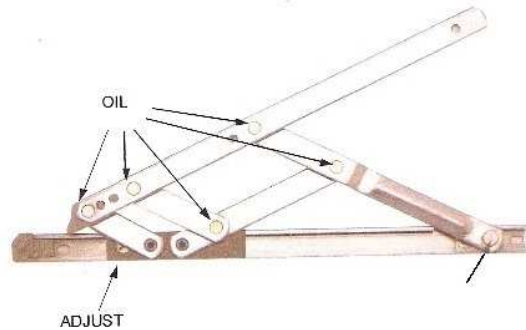

Open Out Awning & Casement Windows

Friction Stays:

Keep the track free from dirt and grime

Lubricate: Oil all pivot points & the sliding track
Wipe away excess oil

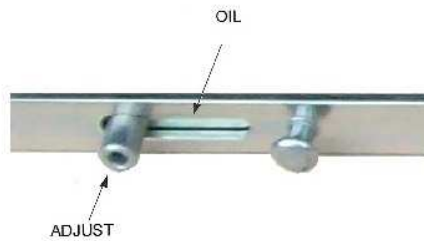

Adjustments: If hinges are tight or loose
Adjust the screws in the plastic sliding bar
Note only slight turning is required

Espagnollete

Lubricate: Mushroom slides

Adjustments: If the window is too tight or loose when closed
The mushrooms can be adjusted with a 4mm allen key
This will either compress the gasket or slacken
compression as required

Striker plates

Lubricate: Apply petroleum jelly or grease
